”Youth Entrepreneurship in Furniture up-cycling for Employment within Circular Economy”

Our project puts forward a program that will help young people become familiar with circular economy, entrepreneurship, professional paths, and acquire abilities and skills for furniture restoration, refurbishment, and recycling.

Project coordinator:

LTETc "Gh.Marzescu" Iasi, ROMANIA

Partner organisations:

- CIRCULAB, Paris, FRANCE
- ECREC, The Hague, THE NETHERLANDS
- CETEM, Yecla, SPAIN
- WONDERLAND, Vienna, AUSTRIA

Our project is in line with The 2030 Agenda for Sustainable Development within Objective 8 regarding “The promotion of inclusive, sustainable growth, of full and productive employment and of decent work for all employees”; also, it is directly linked to ODD 4 concerning education. The development of core abilities to support a sustainable economy is already acknowledged as a critical business matter. Even though the society and companies are heading towards a more eco-friendly economy, the integration of sustainable or ethical business practices within companies is more complex and difficult to attain than a common “help companies become greener” slogan.

Kick-off-Meeting, Iasi, Romania

During the first project semester, the partners attended a KoM in Iasi in order to organize the activities that must be carried out in the following project stages.

The participants presented and discussed the Plans concerning Management, Financial Funding, Quality Control, Communication and Dissemination; furthermore, the second work package (WP2) and the contents of the intellectual product which will be accomplished in three stages until the 30th of September 2024 were also topics of concern.

Expected results:

R1: The toolkit which will comprise a range of approaches and methods used by tutors in order to stimulate entrepreneurship;

R2: TF will include NFE activities for education and practical sessions with the purpose of turning furniture waste into recycled furniture;

R3: The hub platform for young entrepreneurs which involves digital learning opportunities and an environment for exchanging ideas, initiatives and networking;

R4: National conferences for disseminating our project with stakeholders.
