AGAINST CLIMATE AND ENVIRONMENTAL
PROBLEMS. EXAMPLE STUDIES ON THE
RECYCLING OF WASTE MATERIALS.**

PROJECT LOCAL WORKSHOP ACTIVITIES BULLETIN

"Climate changes" is the main topic of a workshop which took place in our school. The activity comprised 21 pupils under the guidance of teacher Gutu Florentina. The workshop started with a pre-test in which pupils expressed their thoughts and put down on paper what they knew about food waste and climate change. Afterwards, the teacher presented a Power Point document followed by explanations and discussions. At the end, the pupils had to fill in a post-test worksheet so that the teacher would assess the newly acquired knowledge on the presented topic. The evaluation showed that pupils had acquired essential information about climate change, strategies for protecting the environment and prevention of food waste.
